5720 Billings Court
Lincoln, NE 68516
(402) 314-3950

Objective: A software development position which allows me to effectively use my web development and problem solving skills to create interesting products while still being challenged and learning new technologies.

Skills:

- Full stack web developer proficient in many languages and frameworks such as ReactJS, MySQL, PHP, HTML, CSS, JavaScript, C#, MongoDB, and more

- Can learn new technologies, languages, and frameworks quickly

- Problem solving skills, deciding which solution is the best based on the given situation

---

Work Experience:

Software Engineer   April 2021 – September 2023
Beehive Industries

- Small team with a fast pace work environment with emphasis on building reusable solutions
- One of two developers on the product team working to create a new platform for cloud based software products with the end goal of moving all existing clients on to the new platform
- Products we built:
  - Asset Management Software
  - Utility Billing Software
  - Fence Estimator Site
  - Public 311s
- Technologies used in development include ReactJS, SQL, CSS, C#, nodeJS, and Azure services
- Integrations with APIs such as stripe, twilio, microsoft blob storage, sendgrid, bing maps, & others
- Often worked with maps and spatial geometries that would be modified by users using OpenLayers

Bartender / Web Developer   September 2019 – May 2021
Lady Luck Lounge - Lincoln, Nebraska

- Developed, launched, and maintained the landing page website
- Promotion to head bartender and in charge of inventory for all alcohol and garnishes

---
